

## How You Can Support FORCE

### Grateful Patients Program

The care your Osteopathic physician provides is the result of years of research and education in the application of the Osteopathic approach to health. The Foundation's objective to advance the philosophy and practice of Osteopathic medicine will allow greater numbers of patients to benefit from Osteopathic care. The Foundation is seeking support to ensure the legacy of the Osteopathic approach that lies in the hands of its students, residents, and practicing physicians continues to impact patient care for years to come.

If you would like to help support the mission of FORCE...

- Consider a donation through the Foundation's Grateful Patients program
- Ask your Osteopathic physician about the Foundation's work
- Contact a Foundation representative directly

### For More Information
